**Prof. Shahid Zafar**

#### **REGISTRATION/TECHNICAL SUPPORT COMMITTEE**

**Dr. Mohd Jameel (Convener)**  
**Prof. Mohd Razzak**  
**Prof. Masood Ahmed**  
**Mr. Uma Shankar**

---

---

#### **ABOUT THE WEBINAR**

---

The origin story of coronavirus seems in late 2019 somewhere at the world famous Huanan seafood market in Wuhan China. The governments across the countries began shutting down schools and colleges temporarily as a measure to contain the spread of the novel coronavirus. It's close to a month and there is no certainty when they will reopen. This is a crucial time for the education sector—board examinations, nursery school admissions, entrance tests of various universities and competitive examinations, among others are all held during this period. As the days pass by with no immediate solution to stop the outbreak of COVID-19, school and university closures will not only have a short-term impact on the continuity of learning for more than 285 million young learners in India but also engender far-reaching economic and societal consequences.

The structure of schooling and learning, including teaching and assessment methodologies, was the first to be affected by these closures. Only a handful of private schools could adopt online teaching methods. Their low-income private and government school counterparts, on the other hand have completely shut down for not having access to e-learning solutions.

---

The students, in addition to the missed opportunities for learning, no longer have access to healthy meals during this time and are subject to economic and social stress.

In the wake of such pandemic following themes would be discussed in this webinar.

1. Issues and Challenges of Students during current pandemic
2. E-Learning issues and their solutions.
3. Remedial measures of problems and issues of education during current and future pandemic outbreak

---
